### Model HM3

Being a toggle press the Hm3 requires very little effort by the operator to obtain a full 1 ton pressure. Features include large print area, large work table, accurate heat control, accurate infinitely variable foil feed with re-wind unit.

The Hm3 also has a rise and fall table with locking screw and adjustable foil feed with manual override for set up purposes.

Having a 76mm opening, this model can accommodate various items, such as business gifts, diaries, plastic mouldings and books.
